

OLIVE MED SKILLS project

Promotion of social inclusion and fight against poverty

Provide young people, especially those belonging to the NEETS, and women with marketable skills.

Project objectives

Increased employability in olive oil sector of women and youths in Italy, Lebanon, Spain, Greece and Tunisia

Project summary

At Mediterranean level, the socio-economic analysis and the related data have incontrovertibly shown that there are two categories that are the most disadvantaged and that were hit the most by the crisis: women in all age groups and youths, in particular the NEETS (“Not –engaged- in Education, Employment or Training”).

The idea was to study and develop common training and technical assistance tools, taking in consideration the local training needs and peculiarities, but creating models replicable at Mediterranean level (to be used also in other local contexts).

Then, some training paths can be activated in each region, with a final sharing of results and potential business ideas.
